

## Vision

InterCAD is passionately committed to the engineering community to provide the right software solution for their engineering applications and to help professionals with implementation on cutting edge technologies, and realize their true potential.

## Mission

InterCAD commits to facilitating highly professional software solutions to the clients for their advanced productivity in focus with the latest technology and trends. It commits to provide right CAD outsourcing solutions to the clients worldwide

### InterCAD Focus:

- The focus will be on quality and to provide solutions to the customers in a minimum lead time.
- With a clear understanding of customer needs with a large experience and latest technology, InterCAD delivers – the RIGHT product to the RIGHT customer at RIGHT price in RIGHT time.
- Inspiring technology users to excel and contribute to society through innovation.

**INTERCAD SYSTEMS LLC**, Dubai, UAE - the offshoot of InterCAD Systems India is a professional CAD Company engaged in the business of CAD Software sales, CAD BPO, Design Consultancy and Technology Support. Having suitable tie-ups with Software majors, InterCAD sell and support all leading Engineering / CAD related software in UAE. Our Technical Support division can handle all major queries on CAD technology and is the backbone for providing technology inputs to our well established offshore business house for CAD outsourcing. InterCAD handles all major professional software for civil/mechanical/ architectural engineering, shipbuilding, visualization, graphics rendering, etc. InterCAD, with a team of around 100 professionals worldwide, is a "nextgen" software solution provider for the professionals.

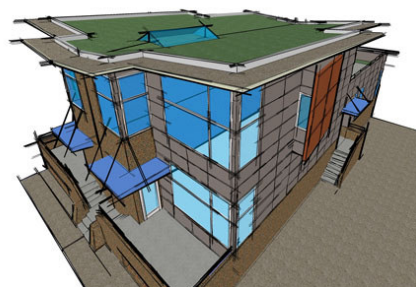

### CAD Software Solutions

Our product division offers solutions to Architects, Consultants, Structural Engineers, Builders and other Civil Engineering companies. As part of our sincere commitment to be the total solution provider for the engineering community, we do provide consultancy services also in the above mentioned areas. Having suitable tie-ups with world leaders in the field, we have a clientele list of hundreds of customers ranging from individuals to private and government organizations in India.

### CAD Outsourcing

Our consultancy division is capable of providing solutions to mechanical / Civil engineering field in the area of design, modeling, simulation, analysis, manufacturing, detailing, reverse engineering etc using leading software. We already have more than 100,000 man hour experiences in CAD related work with consultants, architects, and other government organizations. We have a design outsourcing unit at India for professional implementation of projects at the right time, at the right price with highest possible quality standards.

### CAD Services

With rich domain knowledge and having hundreds of thousands of man-hour experience in CAD Services, we provide all basic CAD services including CAD drafting, Paper to CAD conversion, Architectural Drafting / Design, 3D Modeling & Visualization, Raster to Vector conversion and File translations. We have a dedicated team of professionals for providing services in the field of Civil Engineering, GIS & Mapping, Architectural, Structural Designing and Detailing, and Interior Designing.

Building Information Modeling (BIM) is the latest trend in the Building Design and Construction industry and greatly enhances productivity by allowing easy retrieval of embedded information such as quantities, specifications and manufacturer's details, and provides interactive links between architectural, engineering and construction-related information. Since we anticipate the trends and demands of future, we focus to equip ourselves with this domain knowledge and try to evolve capabilities of use of BIM and there by improve productivity due to easy retrieval of information, to Embed and link of vital information such as vendors for specific materials, location of details and quantities required for estimation and tendering, to increase speed of delivery and to reduce cost and enhance profit for our clients.

### Why InterCAD?

The reasons behind the success of InterCAD activities are dedication and Quality. Our quality control methodology is so strict that we make sure that all processes are made for the customer satisfaction and it helps ourselves in establishing as the best supporting company in both CAD technology, and services.

As far as CAD Services are concerned, the streamlining of process is the key to ensuring quality. From first contact, through multiple consultation loops and daily reviews, tight schedules and timely delivery, we have evolved sophisticated systems that have brought down the margin of error to a minimum.

Considering the concept of providing a one stop shop for all your CAD activities InterCAD strives to provide high quality CAD solutions through dedicated & focused manpower with minimum loss of time and money for our customers.
